How technology has changed our lives …

Last week my wife suggested we should have a weekend break: Barcelona, or perhaps Prague. After a few minutes on my computer I (0) *was able to* / *could* book flights and a hotel, then print out airline tickets and a hotel voucher – all done in less than half an hour. Nothing surprising about that, you might say. But then I suddenly remembered how things were different when I was a child. If my parents wanted to go away they (1) *can't / couldn't* just use the Internet – because there was no Internet. Well, of course it existed, but ordinary people (2) *couldn't / weren't able to* use it, it was only used by a few universities and some government agencies. No, they had to phone a travel agent or drive into town and go to a travel agency.

It's the same thing with phones. I remember once, when I was a teenager, going out with some friends and missing the last bus home. Of course, none of us had a mobile phone. So we spent hours searching for a phone box so we (3) *could / can* call for a taxi. Eventually we (4) *could / managed to* find one, but by then it was 2 a.m. and we were freezing cold. In those days mobile phones were an expensive luxury. Even if you had one, you (5) *could only / were only able to* use it in big cities because there

was no signal in the countryside. And they were huge – not much smaller than a house brick. Now I have a phone that's no bigger than a box of matches. And I (6) *can / manage to* phone anyone, anywhere in the world, any time I feel like it. It can even (7) *using / be used* to look at the Internet. (8) *Do you can / Can you* imagine how exciting it was the first time an engineer managed (9) *to make / making* a phone small enough to put in your pocket? It must have been amazing. But I'm sure that in the future they (10) *can / will be able to* make them small enough to wear as a wristwatch!

FAQs

Setting up a broadband connection and wireless network in your home.

My wireless network is very slow and sometimes it doesn't work. What can I do to improve it?

The most important thing is the position of your router (the machine that sends out the wireless signals). You (0) *are allowed to* / (*have to*) put it in the centre of the house. And it (1) *mustn't be / doesn't have to be* next to a TV or computer as they may interrupt the signals.

I've only got one phone line. (2) *Do I have to / Must I* have a second line for a broadband connection?

No, you (3) *don't have to / mustn't* have a separate phone line, you can use one line.

I don't have a phone line in my house but my neighbour's phone line runs across the front of my house. (4) *Am I allowed to / Have I got to* use his line for my Internet connection?

No. You (5) *don't have to / aren't allowed to* use somebody else's phone line; it's illegal! In any case, it wouldn't work. You will (6) *must / have to* get your own phone line, I'm afraid.

Is it true that (7) *you have to / it must be to* set up a special password?

No, you (8) *haven't got to / don't have to* set up a password for your router, but it is a good idea to do so, as it will prevent other people using your connection.
