My aunt Gabriella is 82 years old and she used to say that she wasn't interested in learning how to use <sup>1</sup> \_\_\_\_\_. "I'm too <sup>2</sup> \_\_\_\_\_ for these <sup>3</sup> \_\_\_\_\_ things," she used to say. Computers are too <sup>4</sup> \_\_\_\_\_ for me to understand. Then I moved to this country to study. She didn't have a <sup>5</sup> \_\_\_\_\_ and, for a while, she called me on her <sup>6</sup> \_\_\_\_\_ phone, but it was very expensive. However, a month ago, her son, my cousin Ricky, gave her a <sup>7</sup> \_\_\_\_\_, and so she discovered the <sup>8</sup> \_\_\_\_\_. Now we see each other on a <sup>9</sup> \_\_\_\_\_ call once a week and she tells me all about the results of her research – on everything! News, the place where I live, the place where she lives, history (two weeks ago she found a <sup>10</sup> \_\_\_\_\_ that talks about her father) – she even <sup>11</sup> \_\_\_\_\_ music now! I had to tell her to be <sup>12</sup> \_\_\_\_\_!

The first computer was called ENIAC, and a group of scientists built it in the 1940s. It was much larger than the <sup>1</sup> \_\_\_\_\_ computers of today. The machine was <sup>2</sup> \_\_\_\_\_ because it filled a very large room. In fact, a <sup>3</sup> \_\_\_\_\_ two-bedroom home in the UK is half the size of this room. Can you imagine having a computer that's bigger than your house? It's really <sup>4</sup> \_\_\_\_\_. How did this computer work? It was not <sup>5</sup> \_\_\_\_\_ to use and several people used it at the same time. Also, it didn't have a screen or a printer. It put holes in paper cards, and people had to read the cards to get information. That sounds <sup>6</sup> \_\_\_\_\_, doesn't it?
