Trung tâm Pompidou là Trung tâm Nghệ thuật Paris, đặt Paris làm thánh địa cho nghệ thuật quốc tế, là nơi trưng bày nghệ thuật và triển lãm nghệ thuật đương đại lớn nhất ở châu Âu, và khoảng 30 triển lãm đặc biệt được tổ chức hàng năm

The Pompidou Centre

More than three decades after it was built, the Pompidou Centre in Paris has survived its moment at the edge of architectural fashion and proved itself to be one of the most remarkable buildings of the 20th century.

It was the most outstanding new building constructed in Paris for two generations. It looked like an explosion of brightly coloured service pipes in the calm of the city centre. However, when in 1977 the architects Richard Rogers and Renzo Piano stood among a large crowd of 5,000 at the opening of the Centre Culturel d'Art Georges Pompidou (known as the Pompidou), no one was really aware of the significance of this unusual building.

Rogers was only 38 when he and Piano won the competition to design a new cultural centre for Paris in the old market site. Young, unknown architects, they had been chosen from a field of nearly 700 to design one of the most prestigious buildings of its day. After six difficult years, with 25,000 drawings, seven lawsuits, battles over budgets, and a desperate last-minute scramble to finish the building, it had finally been done.

Yet the opening was a downbeat moment. The Pompidou Centre had been rubbished by the critics while it was being built, there was no more work in prospect for the architects, and their partnership had effectively broken down. But this was just a passing crisis. The Centre, which combined the national museum of modern art, exhibition space, a public

library and a centre for modern music, proved an enormous success. It attracted six million visitors in its first year, and with its success, the critics swiftly changed their tune.

The architects had been driven by the desire for ultimate flexibility, for a building that would not limit the movement of its users. All the different parts were approached through the same enormous entrance hall and served by the same escalator, which was free to anyone to ride, whether they wanted to visit an exhibition or just admire the view. With all the services at one end of the building, escalators and lifts at the other, and the floors hung on giant steel beams providing uninterrupted space the size of two football pitches, their dream had become a reality.

The image of the Pompidou pervaded popular culture in the 1970s, making appearances everywhere - on record-album covers and a table lamp, and even acting as the set for a James Bond film. This did much to overcome the secretive nature of the architectural culture of its time, as it enabled wider audience to appreciate the style and content of the building and so moved away from the strictly professional view.

The following year, Rogers was commissioned to design a new headquarters for Lloyd's Bank in London and went on to create one of Britain's most dynamic architectural practices. Piano is now among the world's most respected architects. But what of their shared creation?

It was certainly like no previous museum, with its plans for a flexible interior that not only had movable walls but floors that could also be adjusted up or down. This second feature did not in the end survive when the competition drawings were turned into a real building. In other ways, however, the finished building demonstrated a remarkable degree of refinement - of craftsmanship even - in the way the original diagram was transformed into a superbly detailed structure. It was this quality which, according to some critics, suggested that the Pompidou should be seen as closer to the 19th-century engineering tradition than the space age.

Nevertheless, as a model for urban planning, it has proved immensely influential. The Guggenheim in Bilbao* and the many other major landmark projects that were built in the belief that innovatively designed cultural buildings can bring about urban renewal are all following the lead of the Pompidou Centre.

Other buildings may now challenge it for the title of Europe's most outlandish work of architecture. However, more than a quarter of a century later, this construction - it is hard to call it a building when there is no façade, just a lattice of steel beams and pipes and a long external escalator snaking up the outside - still seems extreme.

Today, the Pompidou Centre itself still looks much as it did when it opened. The shock value of its colour-coded plumbing and its structure has not faded with the years. But while

traditionalists regarded it as an ugly attack on Paris when it was built, they now see it for what it is - an enormous achievement, technically and conceptually.

Questions 1-4: Complete the notes below. Write **NO MORE THAN TWO WORDS** from the passage.

The Pompidou Centre in Paris, designed by relatively unknown architects Richard Rogers and (1) _____, stood out as a groundbreaking building in the city. However, at its opening in 1977, few recognized the (2) _____ of this unique structure.

Rogers and Piano then triumphed in the (3) _____ to design this cultural center in Paris after facing stiff competition from hundreds of others.

Last, despite the challenges they encountered during construction, the Centre proved to be a remarkable success, attracting a huge number of (4) _____, in its first year.

Questions 5-8

Complete each sentence with the correct ending, A-F, below.

- 5 The escalators and lifts inside the Pompidou
- 6 In the 1970s, pictures of the Pompidou
- 7 The original plans for the floors of the Pompidou
- 8 The detailed structure of the finished building

- A. reminded some people of past building styles.
- B. were used to decorate everyday objects.
- C. fitted in well with the external surroundings.
- D. were situated on one side of the building.
- E. showed people which area to visit.
- F. were changed during the construction process.

Questions 9-14

Do the following statements agree with the views of the writer in the reading passage?

Write

YES if the statement agrees with the views of the writer

NO if the statement contradicts the views of the writer

NOT GIVEN if it is impossible to say what the writer thinks about this

9. The Pompidou has influenced the way cities are designed.
10. The Guggenheim has been more popular than the Pompidou.
11. The word *building* fits the Pompidou better than the word *construction*.
12. The Pompidou's appearance has changed considerably since it opened.
13. Nowadays, the design of the Pompidou fails to shock people.
14. The traditionalist view of the Pompidou has changed over the years.
