## A fashion in food

There are two things I love: food and social media. I can cook a few things quite <sup>1</sup> ..... (good) but I think sharing photos of food online is a bit strange. I've never taken a photo of my dinner! Just yesterday I saw hundreds of photos of rainbow food. If you haven't heard of it, it's the food people <sup>2</sup> ..... (normal) eat, like burgers and sandwiches, but in all the colours of the rainbow: red, orange, yellow, green, etc. I thought that this fashion was for very young children. My little cousin would <sup>3</sup> ..... (happy) eat a rainbow cake on his birthday. But <sup>4</sup> ..... (surprising), adults seem to love this multi-coloured food, too. I could see from the photos that people have worked very <sup>5</sup> ..... (hard) to make this rainbow food. My question is: why? It's great to cook <sup>6</sup> ..... (creative) but does food that is white or brown need to be pink, blue and yellow? You can already get colourful food very <sup>7</sup> ..... (easy) from real fruit and vegetables. I <sup>8</sup> ..... (complete) agree that food can be fun but does it need to be fake?
