World History: The Scientific Revolution

Create a timeline of events during the Scientific Revolution. You must **include at least 8 from the Scientific Revolution scientists**. Each box needs to be outlined in the specific color and must include **name, date, one sentence summary**, representing the item. Must be in chronological order, meaning in correct order of time it happens.

The diagram shows a central horizontal timeline line. Ten numbered boxes are arranged around it. Boxes 1, 3, 5, 7, and 9 are positioned below the line, with arrows pointing upwards to the line. Boxes 2, 4, 6, 8, and 10 are positioned above the line, with arrows pointing downwards to the line. The boxes are empty, intended for students to write the names of scientists, dates, and one-sentence summaries of their contributions.
