

1) Zamień ułamki zwykłe, liczby mieszane na ułamki dziesiętne.

$$\frac{13}{100} = \boxed{\phantom{00}}$$

$$5\frac{276}{10000} = \boxed{\phantom{0000}}$$

$$\frac{724}{100} = \boxed{\phantom{00}}$$

$$\frac{14}{25} = \boxed{\phantom{00}}$$

$$\frac{1}{4} = \boxed{\phantom{00}}$$

$$8\frac{3}{5} = \boxed{\phantom{00}}$$

2) Zamień na ułamki zwykłe i skróć do ułamka nieskracalnego.

$$0,24 = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$0,65 = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$0,0012 = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$
