

## Match the following Computational thinking concepts to their descriptions

### Decomposition

-Breaking down **dividing** a complex problem or system into smaller, **easier to solve**

### Abstraction

- **focusing on the important information** only, **ignoring irrelevant** details

### Algorithms

- **looking for similarities** among and **within** problems

### Pattern recognition

- **developing a step-by-step solution** to the problem or the rules to follow **to solve** the problem
