Directions Read the following passage and select the best answer.

EXAM FOCUS

Post-it® Notes

Post-it® Notes were invented in the 1970s at the 3M company in Minnesota quite by accident. **Researchers at 3M were working on developing different types of adhesives, and one particularly weak adhesive, a compound of acrylate copolymer microspheres, was developed.** Employees at 3M were asked if they could think of a use for a weak adhesive which, provided it did not get dirty, could be reused. One suggestion was that it could be applied to a piece of paper to use as a bookmark that would stay in place in a book. Another use was found when the product was attached to a report that was to be sent to a colleague with a request for comments on the report, the colleague made his comments on the paper attached to the report and returned the report. The idea for Post-it Notes was born.

1. Which of the sentences below expresses the essential information in the highlighted sentence?

A. Of the many adhesives that were being developed at 3M, one was not a particularly strong adhesive.

B. Researchers at 3M spent many years trying to develop a really weak adhesive.

C. Numerous weak adhesive resulted from a program to develop the strongest adhesive of all.

D. Researchers were assigned to develop different types of uses for acrylate copolymer microspheres.
