

GEOMETRÍA

Superficie de Figuras Geométricas Circulares y Semicirculares

Luis Enrique Lazo Vásquez

 933505841

1.- Calcula el área de la región circular.

$$A_o = \pi \cdot r^2$$

$$A_o = \pi \cdot (\quad)^2$$

$$A_o = \quad \pi \text{cm}^2$$

2.- Calcula el área de la región circular.

$$A_o = \pi \cdot r^2$$

$$A_o = \pi \cdot (\quad)^2$$

$$A_o = \quad \pi \text{cm}^2$$

3.- Calcula el área de la región circular.

$$A_o = \pi \cdot r^2$$

$$A_o = \pi \cdot (\quad)^2$$

$$A_o = \quad \pi \text{cm}^2$$

4.- Calcula el área de la región circular.

$$A_o = \pi \cdot r^2$$

$$A_o = \pi \cdot (\quad)^2$$

$$A_o = \quad \pi \text{cm}^2$$

5.- Calcula el área de la región circular.

$$A_o = \pi.(\quad)^2/2$$

$$A_o = \pi.r^2/2$$

$$A_o = \pi/2$$

$$A_o = \pi \text{ cm}^2$$

6.- Calcula el área de la región circular.

$$A_o = \pi.(\quad)^2/2$$

$$A_o = \pi.r^2/2$$

$$A_o = \pi/2$$

$$A_o = \pi \text{ cm}^2$$

7.- Calcula el área de la región circular.

$$A_o = \pi.(\quad)^2/2$$

$$A_o = \pi.r^2/2$$

$$A_o = \pi/2$$

$$A_o = \pi \text{ cm}^2$$

8.- Calcula el área de la región circular.

$$A_{o/2} = \pi \cdot (\quad)^2 / 4$$

$$A_{o/2} = \pi \cdot r^2 / 4$$

$$A_{o/2} = \pi /$$

$$A_{o/2} = \pi \text{ cm}^2$$

9.- Calcula el área de la región circular.

$$A_{o/4} = \pi \cdot (\quad)^2 / 4$$

$$A_{o/4} = \pi \cdot r^2 / 4$$

$$A_{o/4} = \pi /$$

$$A_{o/4} = \pi \text{ cm}^2$$

10.- Calcula el área de la región circular.

$$A_{o/4} = \pi \cdot (\quad)^2 / 4$$

$$A_{o/4} = \pi \cdot r^2 / 4$$

$$A_{o/4} = \pi /$$

$$A_{o/4} = \pi \text{ cm}^2$$
