DOCTOR WHO

Doctor Who **is a British television programme produced by the BBC since 1963. The programme is about the adventures of a Time Lord called "the Doctor", an alien from the planet Gallifrey. The Doctor explores the universe in a time-travelling space ship called the TARDIS. It looks like a blue British police box – which was something you often saw in Britain in 1963 when the series started – but it is bigger on the inside than on the outside! Together with a number of companions (friends from Earth), the Doctor fights enemies, like the Cybermen and the Daleks, while working to save civilisations and help people in need. The Doctor does not die – he gets a new body instead, that's why many different actors (and one actress!) have played that character. Matt Smith is the 11th of thirteen Doctors so far.** [adapted from Wikipedia]

Where is the TV programme *Doctor Who* made?	
a) in the U.S.A.	c) in Gallifrey
b) in Greece	d) in the U.K.
