Find The Mistakes In The Text

Sandra works as doctor. Sandra work with her friend, Ali. They went to the same university. It was medecine university. Sandra and Ali are best friends. They eat together and go to the mall. They have the same passion, but they are really different. Ali always wear hat and Sandra really likes to read book. The only problem is when Sandra wants to do something she likes Ali prefers doing something else. I think friendship doesn't work like this. Hopefully one day they would like each other's passion.
