

# Life Events

Read the text below about life stages.

There have been lots of studies about **adolescents**, and the way they handle this stage of life depends on different factors. To understand this interesting **stage**, we can **go through** the cycle of life. Before we are born, it is amazing how we grow inside our mothers for about forty weeks. After we are born, the time **goes by** fast. **Childhood** is the time to discover the world and learn many things. After that, we go through one of the most **challenging** stages in life, our teenage years called “adolescence.” Later, when we think we are mature and everything will be simpler, we are sometimes more **confused**. Eventually we decide if we want to have a family, to make money, to travel the world, to buy things. If things go wrong, we get **disappointed**. Finally, we become elderly, we are **relaxed**, but health problems usually start unless you have a healthy life with a **healthy** diet and regular exercise.

Read and write T for true or F for false according to the reading.
