

I. Complete the sentences with the correct words .  
(The correct words are in the square)

Carbon dioxide, Inspiration, Lungs, Breathing,  
Exhalation, Nasal, Oxygen, Respiratory.

The respiratory system is the set of organs responsible for the \_\_\_\_\_ of human beings. Breathing is an automatic process \_\_\_\_\_ and is carried out in two processes.

- The first is the de\_\_\_\_\_ phase, whereby \_\_\_\_\_ is taken from the air that reaches our lungs.
- The second phase is the \_\_\_\_\_ phase, by which we eliminate the \_\_\_\_\_ that comes out of the lungs.

In the breathing process, the air enters through the nostrils \_\_\_\_\_ and passes through the airways \_\_\_\_\_ (larynx, trachea and bronchi) until it reaches the \_\_\_\_\_.
