

# into the **SPACE**

## Activity

**PART 3** Choose the answers from this box. An extra word does not belong to any of the statements.

telescope	spacesuit	radio	oxygen
meteor	handle	galaxy	earth
comet	black hole	astronaut	

1. A \_\_\_\_\_ is a special suit that astronauts wear when they enter space. It protects them and helps them breathe.
2. A \_\_\_\_\_ is a tool that helps astronomers see faraway objects in space, like stars and planets.
3. You hold onto a \_\_\_\_\_, like the \_\_\_\_\_ of a door or a suitcase.
4. An \_\_\_\_\_ is a person who travels in rockets and spaceships and explores space.
5. A \_\_\_\_\_ is a small rock or metal piece from space that enters Earth's atmosphere and burns up, creating a bright streak in the sky.
6. A \_\_\_\_\_ is an area in space where gravity is so strong that nothing, not even light, can escape from it.
7. \_\_\_\_\_ is the planet we live on. It's where you are right now!
8. \_\_\_\_\_ is the air we breathe. It's what keeps us alive. Astronauts need special tanks with oxygen to breathe in space.
9. A \_\_\_\_\_ is a space object made of ice, dust, and gas that travels through space.
10. A \_\_\_\_\_ is a device that lets people talk to each other even when they are far away. Astronauts use radios to talk to mission control on Earth.
