Gapped Text 1

In the future, technology ____ change the way we live our lives. With the advancements we have seen in recent years, it ____ be possible to do things that were once unimaginable. For example, in the next decade, people ____ control household appliances using their smartphones from anywhere in the world. This means you ____ turn on the heating before you arrive home on a cold winter day.

Additionally, with the development of self-driving cars, people ____ travel long distances without actively driving the vehicle. This ____ lead to significant changes in the way we plan our trips, as you ____ work or relax during the journey. Moreover, in the field of medicine, there ____ be new treatments for diseases that were previously incurable. Doctors ____ have access to more effective treatments, and patients ____ recover faster than ever before.

However, as technology evolves, it ____ also raise important questions about privacy and security. People ____ need to be cautious about the information they share online, as it ____ be vulnerable to cyberattacks. Governments ____ need to create regulations to protect citizens in the digital age.

In conclusion, the future ____ bring remarkable changes, and we need to adapt to these transformations wisely.

Gapped Text 2

Last summer, my friends and I decided to go on a camping trip. We planned to hike up a mountain and spend a night in the wilderness. However, things didn't go as smoothly as we hoped. On the first day of the trip, we realized that our map was outdated, and we were lost. Despite our best efforts, we couldn't determine our exact location. We 1._____ have taken a wrong turn somewhere along the way. Our supplies were running low, and the weather was getting worse. We 2._____ see a storm approaching in the distance.

Feeling a sense of urgency, we knew we had to find shelter soon. One of my friends, who had some survival training, suggested that we 3._____ build a temporary shelter using branches and leaves. With his guidance, we 4._____ construct a sturdy enough structure to protect us from the heavy rain. As the night fell, the temperature dropped significantly. We 5._____ start a fire with the little wood we had collected earlier. Luckily, we 6._____ keep the fire going throughout the night.

The following morning, the storm had passed, and the sun was shining again. We 7._____ finally see the trail markers and figure out our location. It turned out we 8._____ have been only a few miles away from the campsite, but the dense fog had obscured our view. Despite the challenges, the experience taught us valuable lessons in resilience and teamwork.
