POKÉMON

Pokémon **was created in 1996** by Nintendo for their best selling console “Game Boy” and **it was released in Japan**. Pokémon are a class of unique little pocket monsters that battle each other following the instructions of their trainer. The overwhelming popularity of the game produced the creation of a Japanese Pokémon Collectible Trading Card Game.

Pokémon are creatures who possess unique powers or special abilities. There are different Pokémon types: Water, Fire, Grass, Ghost, Fairy, Ice, Electric... And many more. One of the most famous Pokémon is **Pikachu** and its trainer is **Ash Ketchum**. Pikachu is a short, chubby, rodent Pokémon, it is covered in yellow fur with two horizontal brown stripes on its back. Pikachu is able to release electric discharges of varying intensity.

POKÉMON

When was Pokémon created?

Where was Pokémon released?

What is a Pokémon?

Who is one of the most famous Pokémon? Who is its trainer?

Use a dictionary to look for the meaning of the following words:
