- 1 My name's Rita. I have a computer at home in the room. I really love it, so I usually use the computer for my photos and I take photos. I also send my photos in emails and show them to my friends. I sometimes do my homework on the computer, too.
- 2 I'm Dan. I talk to friends on the computer and I really like playing computer games. Some of my favourite games are on the Internet. Some of the games are my favourite, like Harry Potter or Spiderman. I've also got a computer and a printer. My mum says I can only play computer games. She wants me to play sports too, not computer games.
- 3 I'm Beth. We have a computer at home, so I go to the computer at school to do my homework. I like typing my work and now I can type it at the computer. I can also print out my homework and use it with the computer too. I use the computer to help with my homework by using a word processor. Finally, I can do my homework online. Everyone does their homework online now. It's great.
