Shipwrecked

You were on a cruise across the Atlantic. But there was an accident in the machine room and the cruise ship sank. Some people were able to reach a lifeboat. But the weather is terrible and the waves are high. The small lifeboat is about to sink; there are **too many people on board**. **Two** of them **must leave the boat and sacrifice their lives for the group**. And you must be quick: You must take your decision within **thirty minutes**. Otherwise the boat will sink and all of you will drown. Decide which two people must leave the boat and justify your decision.
