People, animals, and plants are *alive*. They are called **living things**.

Soil, air, water, and toys are *not alive*. They are called **nonliving things**.

1. Which of the following are living things?

2. Which of the following are non-living things?

3. Which of the following shows that a living thing moves?

4. Which of the following shows that a living thing breathes air?

5. Which of the following shows that a living thing grows?
