Programming
Testing
Self-reflection
Project brief
Planning

Description
This is usually a description of the requirements. Your program must meet the basic requirements to be successful.
Here, you will think about what you did. This will help you improve in the future.
This is about deciding what you need to do and when you need to do it. You will also decompose the problem and create a pseudocode algorithm for the program.
Here, you will create the program using text-based programming software.
You do this part to check that the BMI calculator program meets the basic requirements.
