

### **SUMMATIVE EVALUATION #3**

## MATH

Name: \_\_\_\_\_

Teacher: Ariel Camargo

Level: 4th Grade

Date: \_\_\_\_\_

Score: \_\_\_\_\_ /30 pts

A. Match the object with the most likely measurement. (8 points)

10

● 1 cup

1

- 32 fluid ounces

1

- 4 quarts

1

- 300 gallons

**B. Select the best measurement. (6 points)**

$$4. \quad 4 \text{ gallons} = \quad \text{quarts}$$

$$2. \quad 12 \text{ quarts} = \quad \text{pints}$$

3. 13 cups = fluid ounces

$$6. 3 \text{ gallons} = \text{pints}$$

**C. Type the best unit. (8 points)**

centimeters (cm)

meters (m)

millimeters (mm)

kilometers (km)

**1**

**3**

2,400

100

**2**

**4**

15

8

**D. Complete each conversion. (5 points)**

**1** 5 kilometers =  meters

**3** 33 centimeters =  millimeters

**2** 2 meters =  centimeters

**4** 86 meters =  millimeters

**5** 5 kilometers =  centimeters

**E. Problem solving. (3 points)**

**1** Jordan is running in a 5-kilometer race. She has already run 2,000 meters. How many more meters does she need to run to finish the race?

 Jordan still needs to run  meters.
