

Q. Read the paragraph and answer the questions that follow.

Colours

Colours are all around us. We see them in the sky, the trees, the flowers, and even in our food.

There are many different colours, but some of the most common are red, yellow, blue, green, and black.

Colours can be used to create different moods. For example, red is often used to create a feeling of excitement or danger, while blue is often used to create a feeling of calmness or peace. We can use colors to communicate. For example, the colour green is often used to represent nature, while the colour yellow is often used to represent happiness.
