choose the right option to perform each one of the following tasks

```
#Generate a loop which will repeat 4 times:
for count in range(0,4):
for count in range(1,4):
while count<4 :
```

```
#Ask you to input a name.
str_name= input("enter a name: ")
str_name= output("enter a name: ")
str_name= int("enter a name: ")
```

```
# Ask you to input a town.
str_town= input("enter a town: ")
str_town= output("enter a town: ")
str_town= int("enter a town: ")
```

```
# Output the name and the town in a sentence.
output(str_name, "lives in ", str_town)
int(str_name, "lives in ", str_town)
print(str_name, "lives in ", str_town)
```
