

Reading comprehension

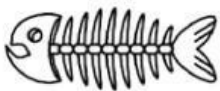

Yun is on the beach. There are a lot of seagulls. Her father said that the seagulls eat animals, like fish, clams and mussels, but they also eat grains and berries. There are also some starfish at the beach. In the dunes there were flies, beetles and snails.

Read the text. Are seagulls carnivores, herbivores or omnivores? Explain how you know.

What life process is carried out when animals eat food? What do they obtain from this life process?

Yun has found a skeleton on the beach. Is it a vertebrate or an invertebrate? Explain how you know.

Yun's dog scared the seagulls when they were fishing for sardines. What group does each of these vertebrates belong to? What covering do their bodies have?

Dog: _____ . Its skin is covered with _____ .
Seagull: _____
Sardine: _____

What characteristics do all invertebrates share?
