

HWEO- Weeks 1 & 2

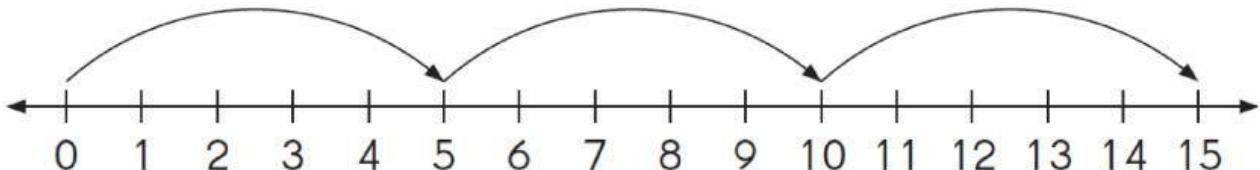

Math Assessment

1. Look at the number line. Write the multiplication fact:

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2. Look at the number line and complete:

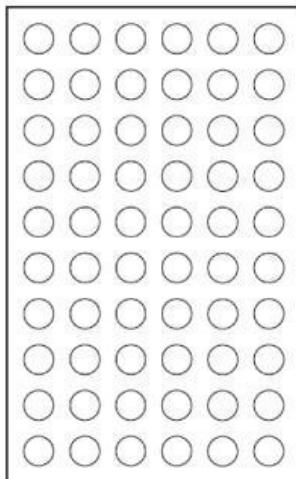

The number line shows _____ skips of _____.

$$\underline{\hspace{2cm}} \text{ skips of } \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ groups of } \underline{\hspace{2cm}} \\ = \underline{\hspace{2cm}}$$

3. Which diagram shows 3×2 ?

- (a)
Three groups of 2 objects each, enclosed in ovals.
- (b)
Three empty ovals.
- (c)
Three groups of 2 objects each, with objects arranged in a 2x2 grid.

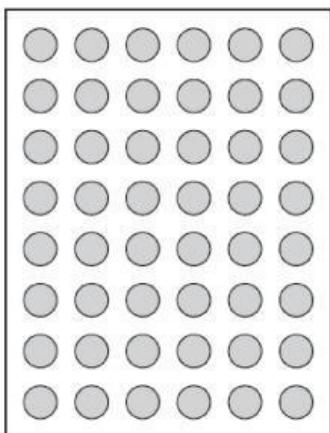

4. Complete:

$$10 \text{ groups of } 6 \text{ dots} = \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$
$$= \underline{\hspace{2cm}}$$

5. Fill in the missing numbers. Use array models to help you:

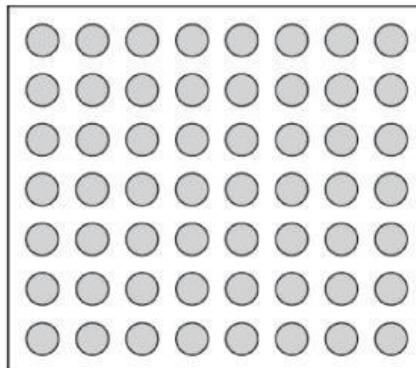

A)

$$8 \text{ groups of } 6 \text{ dots} \\ = 5 \text{ groups of } 6 \text{ dots} +$$

$$\underline{\hspace{2cm}} \text{ groups of } 6 \text{ dots} \\ = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} \\ = \underline{\hspace{2cm}}$$

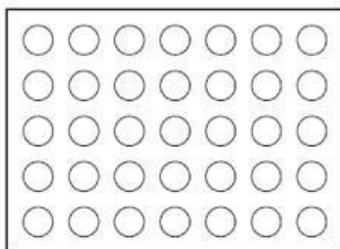

B)

$$7 \text{ groups of } 8 \text{ dots} \\ = 10 \text{ groups of } 8 \text{ dots} -$$

$$\underline{\hspace{2cm}} \text{ groups of } 8 \text{ dots} \\ = \underline{\hspace{2cm}} - \underline{\hspace{2cm}} \\ = \underline{\hspace{2cm}}$$

6. Express this array model as a multiplication fact:

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

7. Solve:

A. $6 \times 6 =$

B. $6 \times 3 =$

C. $6 \times 5 =$

D. $7 \times 2 =$

E. $7 \times 4 =$

F. $7 \times 7 =$

G. $8 \times 0 =$

H. $8 \times 8 =$

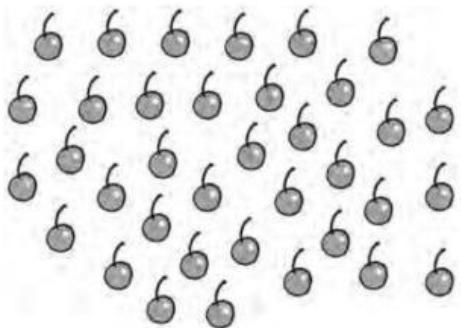

I. $8 \times 5 =$

J. $9 \times 9 =$

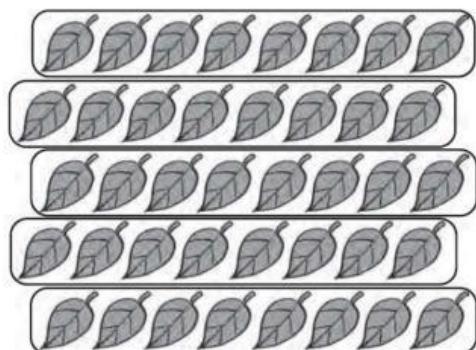

K. $9 \times 7 =$

L. $9 \times 1 =$

8. Complete the division sentences:

$$\underline{\quad} \div 4 = \underline{\quad}$$

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

9. Complete the number patterns:

A)

$$9 \ 18 \ 27 \ \underline{\quad} \ \underline{\quad} \ \underline{\quad}$$

B)

$$24 \ 32 \ 40 \ \underline{\quad} \ \underline{\quad} \ \underline{\quad} \ \underline{\quad}$$

10. Solve:

A)

Graham has 56 stamps. He puts them equally into groups of 8.

$$\boxed{} \div \boxed{} = \boxed{}$$

B) Rex puts equally 63 apples in 7 boxes. How many apples are there in each box?

C) Michael buys 8 bottles of water. He pays \$6 for each bottle. How much does he pay in all?

D) Martha shares a box of cookies with 4 other friends. There are 45 cookies in the box. How many cookies does each child get?
