Unit 6: Weather forecasts and local weather

Select the correct word from the options given

Your weather for Wednesday

We are going to have a mixed **1.** (bag , box , car) today. There will be dense fog in the morning which **2.** (would , no , will) cause traffic problems, **3.** (and , so , because) drive very carefully and leave plenty of room between your car and the car **4.** (in , at , on) front. The fog will have cleared by around 9 am and as the temperature heats up, we are in for sunny **5.** (spells , showers , shocks) and high humidity for the early part of the day.

People have been **6.** (suggested , decided , advised) to avoid doing anything at sea over the next couple of days as high winds are expected to cause very rough **7.** (conditions , severe , gust) with waves two to three metres high.

95% humidity forecasted for tomorrow, especially along **8.** (torrential , coastal , flash) areas as the air fills up with moisture. This will cause some fog and mist in the early morning, so drive carefully.

Weather temperatures continue to **9.** (soar , sure , sore) in the UAE, reaching 44 degrees in Sharjah and 45 degrees in Umm Al Quwain. It will have cooled down by Sunday!

There is a **10.** (straight , severe , strange) weather warning for the late afternoon. The clouds will have rolled in from the south and we will experience torrential rain, which might cause some **11.** (flash , blustery , arid) floods,

especially in mountain wadis. The storm front will have passed through the UAE by Thursday morning.

The north-westerly wind is expected to bring with it a lot of sand and dust storms.

12. (Vision , Visible , Visibility) will be poor so avoid unnecessary car journeys.

Flights may be disrupted so check with your airline before you head to the airport.
