

Beitou Library

Taiwan's first eco-friendly library was built in 2006 in Beitou Park and is called the Beitou Library. Because it is eco-friendly, it uses solar power (太陽能) and has a green roof. It also has a rainwater recycling system.

People who like special buildings also like to visit Beitou Library because it is mostly made of wood and has an interesting shape.

It is a popular (熱門) place for people to read or do research (做研究).

On weekdays, it is open from 8:30 am to 9 pm, so you can go there to read and relax after school.
