

Thermal Valley

Thermal Valley is a green spring (青礦泉) covered with steam or fog.

The temperature is very high: between 80 – 100 degrees!

The water is hot because there is a sleeping volcano under the earth. The water is so hot that people could boil eggs at Thermal Valley, but it is too dangerous.

Now, people can only take pictures and enjoy the scenery.

There is also a shop where you can buy gifts, candy, or even ice cream! It is open from 9 am to 5 pm.

Remember: it is very hot, so don't forget to drink lots of water.
