

Xinbeitou Historic Station

Xinbeitou Historic Station is a very special building. It was built more than 100 years ago so tourists could visit the hot springs.

Tourists also came to see the station because of the style (風格) it was built. When they built the MRT in 1988, the Xinbeitou train station was closed. In 2017, the station opened again, but as a historic (歷史性) museum.

At the Xinbeitou Historic Station, people can learn about the station's history. You can look at the old photos and watch videos or walk in the old railcar (舊火車).

It opens at 10 am and closes at 6 pm, and you can enter for free.
