

27. The table shows the number of cans of soup in each level of a display at a grocery store.

Level (n)	Number of Cans
1	3
2	6
3	12
4	24
n	■

Select the correct values to complete each statement.

2	3	4	6
48	64	72	96

To find additional terms of the sequence, multiply the previous term by .

There will be cans of soup in the sixth level of the display.

The sequence of numbers represents a(n) sequence.
