PROFESSIONAL PROFILE

Compassionate and committed Nurse Practitioner with 4 years fully qualified experience, alongside a successful history of diagnosing and treating a variety of common health conditions. Adept at critical care and management with training in patient education and leadership. Committed to increasing the quality of patient care through top-of-the-line time management and prioritisation. Highly qualified and board certified, driven to build strong relationships with patients and families.

CAREER SUMMARY

Jun 2021 - Present

ABC Nursing, Oxford
Nurse Practitioner

Outline

Led a team of 15 nurses within a busy doctor's surgery, delivering medical care to patients including diagnosing and treating a variety of conditions and illnesses.

Key Responsibilities

- Assessed patients to determine individual needs and develop care plans in coordination with multidisciplinary healthcare professionals.
- Used EMR to create detailed patient reports on patient's condition status and treatments received.
- Executed patient satisfaction and independence by promoting self-nursing skills and knowledge of medications.
- Discussed proposed surgical procedures, risk and potential complications with supervising physician and patient to obtain proper patient informed consent.
- Recruited, hired, led training and managed budget for class of 8 LPNs annually.
- Prescribed appropriate pharmacologic and non-pharmacologic treatment modalities to support health and comfort of patients.
- Offered continuous review of patients from admission to discharge.
- Liaising with patient families and medical specialists to raise concerns and gain extra support where needed
- Providing preventative care such as running clinics for immunisations including diabetes management and COVID-19

Key Achievements

- Ranked highest in patient satisfaction scores over a course of several months and continually achieved higher than 95 percent on patient satisfaction surveys, resulting in more clients joining the surgery.
- Successfully mentored 15+ new NPs to help achieve goals and deliver exceptional health care, resulting in a 62% decrease in patient wait time.

Jan 2019 - May 2021

Family Health Service, Oxford
Family Nurse Practitioner

Outline

Provided direct medical care in Family Health Clinic through exemplary consultation, constant coordination, and timely referrals for a diverse multigenerational patient population with a wide range of clinical issues.

Key Responsibilities

- Worked in women's health services providing counselling on reproductive issues and assisting with family planning needs.
- Provided preventive care such as well-child checks, adult physicals and gynaecological examinations.
- Performed patient physicals and compared and contrasted results with established medical records to provide proper diagnosis and facilitate appropriate treatment.
- Educated and guided patients on disease prevention and healthy lifestyle habits to prevent Type-2 diabetes and other complications.
- Coordinated referrals for specialty services and additional care.
- Served as lead health care provider and office manager for 58-patient family clinic.

Key Achievements

- Delivered a high standard of medical care which increased patient satisfaction rates by 8%.

Dec 2017 - Dec 2018

**Hospital C, Oxford
Family Nurse Practitioner Student**

Outline

Working alongside the Senior Nurse Practitioner to provide high-quality care for patients in an inner-city hospital with diversified needs in an 82-bed acute department.

Key Responsibilities

- Transported patients between unit rooms and scanning locations for diverse procedures.
- Vaccinated patients to protect individuals from measles, pneumonia, influenza and other illnesses of concern.
- Completed skilled phlebotomy tasks to obtain needed biological specimens for laboratory testing.
- Administered close patient care, checked vital signs and monitored telemetry.
- Delivered exceptional care to patients by helping with mobility and daily living requirements.
- Used first-hand knowledge and clinical expertise to advocate for patients under care and enacted prescribed treatment strategies

Nov 2016 - Nov 2017

**Hospital D, Oxford
Nurse Practitioner Intern**

Outline

Based in a busy Oxfordshire Hospital dealing directly with a range of patients to diagnose and treat conditions such as Influenza, Strep A and UTIs.

Key Responsibilities

- Implemented and monitored effectiveness of interventions to assist patients in regaining and maintaining optimal health.
- Referred patients to medical specialists and coordinated patient care with social workers, case managers and mental health professionals.
- Processed lab tests for influenza, strep A and urinary tract infections.
- Ordered and interpreted laboratory and diagnostic tests to provide appropriate follow-up care.
- Established effective relationships with patients and families by respecting patient rights and involving patients and families in decision making.

EDUCATION

- **MSc: Advanced Nurse Practitioner** | Oxford School | 2015 - 2016
- **BSc (hons): Adult Nursing** | Oxford School | 2012 - 2015

Royal College of Nursing (RCN)

Professional Profile

'A recently qualified Adult Nurse with a strong commitment to providing high quality patient-centred holistic care, while developing current nursing knowledge, skills and experience gained as a student'

As a patient-focussed and ambitious Student Nurse I offer a combination of diverse clinical experience, academic excellence, compassion, leadership, and strong interpersonal skills. I am seeking a first post in general medicine nursing where I can utilise and expand on my proven skills in triage, daily care, and problem solving. I am dedicated to providing quality, cost-effective and evidence-based care to help patients achieve optimal outcomes and have a passion for learning and growing professionally within a dynamic healthcare environment.

Core Skills

- Patient care
- Medical clinical procedures
- Wound care
- Broad medical terminology
- Electronic health documentation
- IV administration and management
- Diagnostic testing and result analysis
- Medication and treatment administration
- Broad medical terminology knowledge
- Registered member of the NMC

Education

- **Registered Member of the Nursing and Midwifery Council**
- **BSc (hons) Adult Nursing (predicted 2:1)** – Liverpool University – 2021
- **Access to Higher Education Diploma in Nursing (Distinction)** – Liverpool College – 2018
- **12 x GCSEs (grades A-C)** – Liverpool School – 2016

Career Summary

Sept 2018 – Mar 2021

**Liverpool NHS Trust, Liverpool
Student Nurse (University Placements)**

Outline

Completed several clinical placements across Liverpool NHS Trust, as part of the BSc (hons) Adult Nursing degree. Provided care in line with the patients care plan and under supervision of a Senior Registered Nurse in areas including mental health, general surgery, accident and emergency, and general medicine.

Accident and Emergency (Management experience placement)

Key Responsibilities

- Supported a variety of patients including young children, the elderly, end of life patients, disabled individuals, and pregnant women, with a variety of conditions from minor injuries, severe allergic reactions, cardiac pain, drug overdose etc.
- Conducted initial patient examinations to determine the patient's condition
- Received patients that have been brought in by ambulance including checking in patients and assisting with triage work
- Applied dressings and administered pain relief, antibiotics and other medications as required
- Worked closely with doctors and other members of the team to keep patients and their family members updated on test results or treatment recommendations
- Planned for patients to be admitted to the hospital for one night or longer
- Referred patients to other departments such as osteopathy, radiology, and cardiology
- Maintained detailed and accurate patient records
- Completed all necessary discharge paperwork
- Maintained exemplary care standards in accident and emergency

Achievements:

- Spot checks for triaging patients, including taking and recording vital signs and patient history, resulted in 99.8% correct results.
- Received consistent positive evaluation scores of over 96% for patient education.

Surgical Unit

Key Responsibilities

- Ensured patients were fully informed about the risks and benefits of their upcoming operation and ensured they are in a good state of health for surgery
- Provided patients with detailed information about the operation and answered any follow up questions with accuracy
- Assessed patients prior to their surgery, to ensure they were able to receive their anaesthetic
- Supported the anaesthetist by preparing specialist equipment, devices, and drugs
- Prepared all the necessary complex instruments and equipment used within the surgery including microscopes, lasers, and endoscopes
- Worked with the surgeon to provide instruments, needles, swabs, and other materials as required
- Provided post-operative support, care and treatment until the patient has recovered from the effects of the anaesthesia and/or surgery
- Monitored patients and assessed their condition to ensure they can be discharged back to the ward

Achievements:

- Assisted patients with surgical preparation, receiving 96% positive feedback from patients for compassion.
- Sterilised surgical instruments and prepared surgical trays for use in theatre, scoring 100% during all spot checks.

General Medical Unit

Key Responsibilities

- Assessed patients of all ages and with a variety of health conditions
- Maintained accurate patient records including medical histories and symptoms
- Monitored patient's health or recovery while recording their observations
- Administered medications and treatments
- Worked closely with the wider multi-disciplinary team to create uniquely tailored patient-care plans
- Completed a variety of diagnostic examinations and analysed the results
- Educated patients and their families on how to follow their prescribed treatment and recovery plan once discharged
- Planned patient discharge including liaising with GPs and social services if applicable

Achievements:

- Worked closely with patients to improve mobility and prevent skin breakdown, resulting in a 10% lower bedsores rate than average across a 60-bed ward.

Mental Health Unit

Key Responsibilities

- Worked with patients in a variety of environments including hospital wards, homes, outpatient departments, residential units, and community drop-in centres
- Provided effective care for patients with acute mental health conditions
- Administered medication and treatments
- Monitored and analysed the results of ongoing medication and treatment
- Supported patients to de-escalate stressful situations and overcome challenges
- Worked closely with patients' families and other care staff to offer advice and information around a variety of mental health conditions
- Maintained accurate and detailed patient records including care plans and risk assessments

Achievements:

- Commended by the Lead Mental Health Registered Nurse for compassion and support towards several challenging patients with acute mental health conditions.
