

ZENBAKI DEZIMALDUNAK:

Unitatea, hamarrena eta ehunena

ZER DA HAMARRENA?

Zer da
hamarrena?

Unitatea 10 zati berdinetan banatzen badugu, zati bakoitza hamarren bat da.

1 hamarren

$$1 \text{ unitate} = 10 \text{ hamarren}$$

$$1 \text{ U} = 10 \text{ h}$$

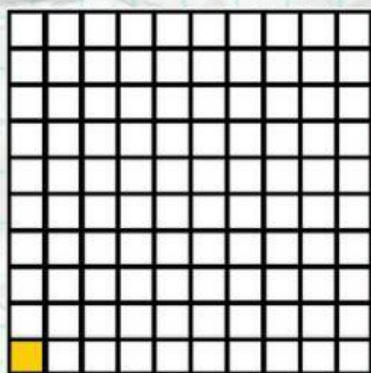

Hamarren bat honela adierazten da:

$$\frac{1}{10} \text{ edo } 0,1.$$

ZER DA EHUNA?

Zer da
ehunena?

Unitatea 100 zati berdinetan banatzen badugu, zati bakoitza ehunen bat da.

1 ehunen

$$1 \text{ unitate} = 100 \text{ ehunen}$$

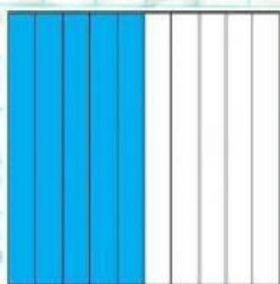

$$1 \text{ U} = 100 \text{ e}$$

Ehunen bat honela adierazten da:

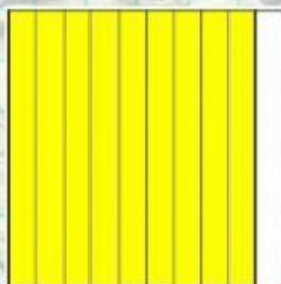

$$\frac{1}{100} \text{ edo } 0,01.$$

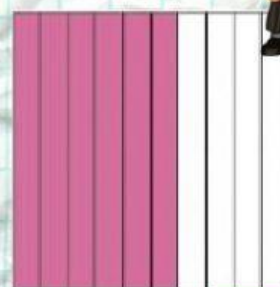

1) Zenbat hamarren edo ehunen daude margotuta kasu bakoitzean?

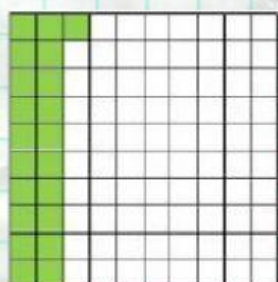

hamarren = $\frac{\text{input}}{10} = 0,5$

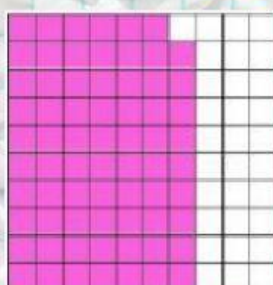

hamarren = $\frac{\text{input}}{\text{input}} = \text{input}$

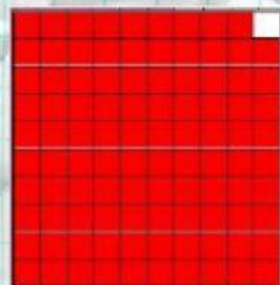

hamarren = $\frac{\text{input}}{\text{input}} = \text{input}$

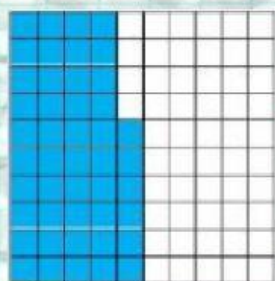

ehunen = $\frac{\text{input}}{100} = 0,21$

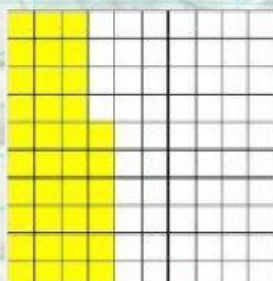

ehunen = $\frac{\text{input}}{\text{input}} = \text{input}$

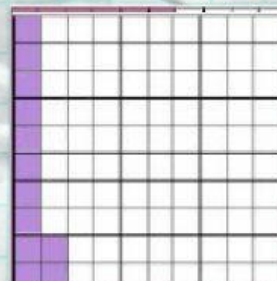

ehunen = $\frac{\text{input}}{\text{input}} = \text{input}$

ehunen = $\frac{\text{input}}{100} = 0,46$

ehunen = $\frac{\text{input}}{\text{input}} = \text{input}$

ehunen = $\frac{\text{input}}{\text{input}} = \text{input}$

2) Erreparatu adibideari, eta idatzi honako zatiki hauen adierazpen dezimaldunak:

$\frac{3}{10} = 0,3$

$\frac{9}{10} = \text{input}$

$\frac{12}{100} = \text{input}$

$\frac{56}{100} = \text{input}$

$\frac{7}{10} = \text{input}$

$\frac{25}{100} = \text{input}$

$\frac{79}{100} = \text{input}$

$\frac{2}{10} = \text{input}$

$\frac{34}{100} = \text{input}$

$\frac{9}{100} = \text{input}$
