13. Fractions and Divisions

A. Visual learning

How can you share items?

Tom, Joe, and Sam made clay pots using a total of two rolls of clay.

If they share the clay equally, how much clay did each friend use?

Divide 2 by 3 to find what fraction of the clay each person used.

Step 1

Think about sharing 2 rolls of clay among 3 people.

Divide each roll into 3 equal parts.

Step 2

The part were shared equally.

You can write division as a fraction.

So, $2 \div 3 = \frac{2}{3}$

Tom Joe Sam

B. Vocabulary

fraction:_____

divide: _____

division: _____

share equally: _____

C. Independent practice

In **1 – 4**, write each division expression as a fraction.

1. $9 \div 11 = \dfrac{\Box}{\Box}$

2. $1 \div 10 = \dfrac{\Box}{\Box}$

3. $25 \div 6 = \dfrac{\Box}{\Box}$

4. $12 \div 7 = \dfrac{\Box}{\Box}$

*In **5 – 8**, write the divisions and fractions each person gets when they share equally.*

5. Nine soccer players share 5 bottles of water. $5 \div 9 = \dfrac{\square}{\square}$

6. Two sisters share 1 bag of popcorn. $\underline{\quad} \div \underline{\quad} = \dfrac{\square}{\square}$

7. Four friends share 5 chocolate bars. $\underline{\quad} \div \underline{\quad} = \dfrac{\square}{\square}$

8. Five brothers pay for a $3 card. $\underline{\quad} \div \underline{\quad} = \dfrac{\square}{\square}$

9. A group of friends went to the movie. They shared 2 bags of popcorn equally.

If each person got $\dfrac{2}{3}$ of a bag of popcorn, how many people were in the group?

_____

_____

_____

10. You have 2 liters of milk for 5 days equally. How much milk can you drink each day?

_____

_____
