TASK 3. READING. Fill in each blank with ONE correct word.

Swans

Example Swans are the largest birds in the duck

1 family. There are six different kinds swans which have white bodies, but in a few parts of the world there are black swans too. Swans are clever and remember people who have

2 kind or unkind to them! A frightened

3 really angry swan can break a man's leg

4 its strong wings!

Swans live on rivers and lakes. But in the winter months, some might live near the sea because salt water is usually a little

5 than river water. Swans don't usually fly

6 very far from the place they build their nests. It takes between 35 and 42 days for a baby swan, which

7 called a 'cygnet', to break open its egg!

8 A baby swan can be grey white. Wild swans usually live for about seven years, but some live a lot longer. A swan

9 eats underwater plants. It finds these by its long neck deep into the water and its tail up into the air! Swans might

10 eat small frogs and insects.
