GAP YEAR TRAVELLING

A gap year between school and university could be of benefit to your future, especially if you make the most of it by working and travelling abroad. Not only are you likely to increase your self-confidence by living in another country but you will also add valuable work experience to your CV – a bonus when it comes to job hunting after college.

Planning to take twelve to fifteen months off need not be difficult if you do your homework. Although travelling or working abroad for voluntary organisations may prove expensive if you lack sufficient funds, it is possible to combine your travels with paid work experience.

Since 1962, BUNACAMP, a non-profit organisation, has enabled thousands of full-time students to work in America and Canada each year. There is a wide range of programmes to choose from and they are designed to be self-financing, so you should be able to earn back your initial expenses and have sufficient money to pay for your post-work travels.

Work America and *Work Canada* are open to full-time students and those who have postponed their entry and have a place at university for the following year. Those taking part in the programme can take almost any job anywhere for the summer.

BUNACAMP Counsellors places both students at children's summer camps in the USA. Those aged between 19 and 35, with relevant experience of working with groups of children, can spend up to eight weeks teaching sporting, arts and dramatic activities at camp and have time to travel around North America afterwards.

Work Australia offers 18-25-year olds more time to spare, the opportunity to work and travel 'down under' for up to twelve months.

Hardly anyone should hesitate to make their choice: all they have to do is decide where they want to go!
