

Match each word or group of words to complete each sentence or statement

- ___ 11. _____ energy, such as ultraviolet radiation, travels in the form of waves.
- ___ 12. Fossil Fuels contain ___ potential energy stored millions of years ago.
- ___ 13. As water runs over a waterfall, its potential energy is converted into ___ energy because of its position and motion.
- ___ 14. A truck and car are moving at the same speed. The truck has greater mechanical energy because its _____ energy is greater, since its mass is greater. (assume the truck and the car have the same potential energy)
- ___ 15. An electric motor converts _____ energy into mechanical energy
- ___ 16. A baseball flying through the air has _____ energy because of its position and motion.
- ___ 17. The energy in the fuel of a rocket engine is _____ potential energy.
- ___ 18. In power plants, generators convert mechanical energy into _____ energy.
- ___ 19. To maintain your body temperature, your body converts chemical potential energy into _____ energy.

- a. electromagnetic
- b. mass
- c. kinetic
- d. mechanical
- e. chemical
- f. energy
- g. electrical
- h. energy
- i. thermal

- ___ 20. The type of energy the pendulum has at position 2 is _____ energy.
