Read the three short texts below about a Swedish woman called Anna Bågenholm, who had an accident. Then listen to an interview about her and decide which is the best summary of the accident.

a Anna had an accident while skiing. Nobody found her for several hours and when they did, they believed she was dead. But when she arrived at the hospital, she came back to life. ☐

b Anna tried to rescue a colleague who had an accident in the mountains, but fell into some freezing water. She only survived because a helicopter took her to hospital. ☐

c Anna had an accident while skiing. She became so cold that her breathing and heartbeat stopped for hours, but she made a full recovery. ☐

LIVEWORKSHEETS

Listen again. Are the sentences true (T) or false (F)? Correct the false sentences.

1 About a third of people whose body temperature drops to below 28°C do not survive. ☐

2 Anna's colleagues called for help seven minutes after the accident. ☐

3 The first rescue team cut a hole in the ice and the second team pulled her out. ☐

4 Anna's body temperature was 30.7°C when she arrived at the hospital. ☐

5 Her heart did not begin beating again until her body temperature reached 36.4°C. ☐
