I had just started a famous celebrity-sponsored diet when I met nutritionist Gemma Starkey and asked her what she thought about it. "If you had started this diet three weeks ago, you

<sup>1</sup> ..... 8-10 kg by now," she said. "But, if you continued with the diet for two months or more, you <sup>2</sup> ..... weak and ill because your body would be missing vital nutrients." It appears this is the problem with most diets. When your body <sup>3</sup>

..... that something is missing, it sends a message to the brain to get it.

That's when we give up on the diet and, after a few days of feasting, we end up back where we started. So, do diets work?

"If they <sup>4</sup> ....., we would all be slim," said Gemma. "I wish

I <sup>5</sup> ..... more positive, but I'm trying to be honest. However, if you

<sup>6</sup> ..... to lose weight, I can help you. Eat exactly what you eat now,

including all the unhealthy things, but eat less and eat earlier in the day. When you eat in the

evening, your body <sup>7</sup> ..... time to digest the food before you go to sleep.

Research has found that, if you eat later in the evening, you <sup>8</sup> ..... weight,

even if you eat exactly what you ate before. Your cholesterol levels will also increase and, if that<sup>9</sup> ..... , the chance of you having a heart attack will also increase.”

If only I<sup>10</sup> ..... all this from her earlier, I wouldn’t have had to give up chocolate and pizza. I could just have had half a bar of chocolate and a small-size pizza. It wouldn’t have been perfect, but certainly better than nothing.
