10 Multiple choice questions

Term 1 of 10

A 30 percent reduction in the grain harvest often

- reduces rice harvest yields by between thirty and fifty percent.
- other stuff, which means the people who make that other stuff are suddenly unemployed and hungry.
- doubled the price of bread, whereas a fifty percent reduction quintupled it.
- work efficiently because the body's basic metabolism still requires 1,500 calories.

Term 2 of 10

A decrease from 2,500 to 2,000 calories halves our ability to

- doubled the price of bread, whereas a fifty percent reduction quintupled it.
- migration, invasions, higher taxes, people trying to reduce the number of mouths they had to feed
- other stuff, which means the people who make that other stuff are suddenly unemployed and hungry.
- work efficiently because the body's basic metabolism still requires 1,500 calories.

Term 3 of 10

Climate is not _____.

- food shortages and taxes. The taxes were high and the food was short because the harvests were bad.
- migration, invasions, higher taxes, people trying to reduce the number of mouths they had to feed
- weather
- doubled the price of bread, whereas a fifty percent reduction quintupled it.

Term 4 of 10

Unrest was often linked to

- migration, invasions, higher taxes, people trying to reduce the number of mouths they had to feed
- doubled the price of bread, whereas a fifty percent reduction quintupled it.
- food shortages and taxes. The taxes were high and the food was short because the harvests were bad.
- work efficiently because the body's basic metabolism still requires 1,500 calories.

Term 5 of 10

When people have to spend more on food, they don't have money to spend on

- work efficiently because the body's basic metabolism still requires 1,500 calories.
- doubled the price of bread, whereas a fifty percent reduction quintupled it.
- other stuff, which means the people who make that other stuff are suddenly unemployed and hungry.
- migration, invasions, higher taxes, people trying to reduce the number of mouths they had to feed

LIVEWORKSHEETS

Term 6 of 10

According to Geoffrey Parker, a fall of two degrees Celsius during the growing season, precisely the scale of global cooling in the 1640s,

- doubled the price of bread, whereas a fifty percent reduction quintupled it.
- reduces rice harvest yields by between thirty and fifty percent.
- human sinfulness and witches
- work efficiently because the body's basic metabolism still requires 1,500 calories.

Term 7 of 10

Bad weather and poor harvests prompted

- work efficiently because the body's basic metabolism still requires 1,500 calories.
- migration, invasions, higher taxes,
  people trying to reduce the number of mouths they had to feed
- other stuff, which means the people who make that other stuff are suddenly unemployed and hungry.
- food shortages and taxes. The taxes were high and the food was short because the harvests were bad.

Term 8 of 10

Little Ice Age

- bringing hunger and, in some cases, starvation to millions of people. And because they were so catastrophic, people wrote about them, which leaves us a historical record.
- Temporary but significant cooling period between the fourteenth and the nineteenth centuries; accompanied by wide temperature fluctuations, droughts, and storms, causing famines and dislocation.
- migration, invasions, higher taxes,
  people trying to reduce the number of mouths they had to feed
- food shortages and taxes. The taxes were high and the food was short because the harvests were bad.

Term 9 of 10

Bad harvests are crucial to our understanding of the Little Ice Age because they were catastrophic events,

- bringing hunger and, in some cases, starvation to millions of people. And because they were so catastrophic, people wrote about them, which leaves us a historical record.
- work efficiently because the body's basic metabolism still requires 1,500 calories.
- migration, invasions, higher taxes,
  people trying to reduce the number of mouths they had to feed
- human sinfulness and witches

Term 10 of 10

What did the people in the seventeenth century say the cause of the calamitous bad weather was?

- bringing hunger and, in some cases, starvation to millions of people. And because they were so catastrophic, people wrote about them, which leaves us a historical record.
- other stuff, which means the people who make that other stuff are suddenly unemployed and hungry.
- reduces rice harvest yields by between thirty and fifty percent.
- human sinfulness and witches
