

DOMINÓ DE FRACCIONES

Tenemos las 28 piezas de un dominó de fracciones (56 fracciones). Para conocer sus piezas y jugar con él, hay que *simplificar las fracciones* a su correspondiente fracción equivalente irreducible.

Nota: Si alguna fracción es ya irreducible, repítela.

$\frac{7}{21} = \underline{\hspace{1cm}}$	$\frac{12}{60} = \underline{\hspace{1cm}}$	$\frac{12}{24} = \underline{\hspace{1cm}}$	$\frac{24}{18} = \underline{\hspace{1cm}}$	$\frac{5}{15} = \underline{\hspace{1cm}}$	$\frac{4}{8} = \underline{\hspace{1cm}}$	$\frac{30}{20} = \underline{\hspace{1cm}}$
$\frac{24}{20} = \underline{\hspace{1cm}}$	$\frac{5}{50} = \underline{\hspace{1cm}}$	$\frac{6}{5} = \underline{\hspace{1cm}}$	$\frac{44}{33} = \underline{\hspace{1cm}}$	$\frac{32}{24} = \underline{\hspace{1cm}}$	$\frac{4}{3} = \underline{\hspace{1cm}}$	$\frac{36}{24} = \underline{\hspace{1cm}}$
$\frac{20}{15} = \underline{\hspace{1cm}}$	$\frac{25}{50} = \underline{\hspace{1cm}}$	$\frac{10}{50} = \underline{\hspace{1cm}}$	$\frac{1}{3} = \underline{\hspace{1cm}}$	$\frac{6}{4} = \underline{\hspace{1cm}}$	$\frac{12}{9} = \underline{\hspace{1cm}}$	$\frac{5}{10} = \underline{\hspace{1cm}}$
$\frac{8}{80} = \underline{\hspace{1cm}}$	$\frac{30}{90} = \underline{\hspace{1cm}}$	$\frac{40}{30} = \underline{\hspace{1cm}}$	$\frac{4}{40} = \underline{\hspace{1cm}}$	$\frac{8}{6} = \underline{\hspace{1cm}}$	$\frac{60}{50} = \underline{\hspace{1cm}}$	$\frac{1}{5} = \underline{\hspace{1cm}}$
$\frac{9}{6} = \underline{\hspace{1cm}}$	$\frac{12}{36} = \underline{\hspace{1cm}}$	$\frac{12}{8} = \underline{\hspace{1cm}}$	$\frac{1}{2} = \underline{\hspace{1cm}}$	$\frac{20}{100} = \underline{\hspace{1cm}}$	$\frac{7}{35} = \underline{\hspace{1cm}}$	$\frac{3}{9} = \underline{\hspace{1cm}}$
$\frac{6}{60} = \underline{\hspace{1cm}}$	$\frac{75}{50} = \underline{\hspace{1cm}}$	$\frac{18}{15} = \underline{\hspace{1cm}}$	$\frac{2}{4} = \underline{\hspace{1cm}}$	$\frac{15}{10} = \underline{\hspace{1cm}}$	$\frac{2}{10} = \underline{\hspace{1cm}}$	$\frac{3}{15} = \underline{\hspace{1cm}}$
$\frac{3}{6} = \underline{\hspace{1cm}}$	$\frac{3}{30} = \underline{\hspace{1cm}}$	$\frac{10}{30} = \underline{\hspace{1cm}}$	$\frac{12}{10} = \underline{\hspace{1cm}}$	$\frac{10}{20} = \underline{\hspace{1cm}}$	$\frac{72}{60} = \underline{\hspace{1cm}}$	$\frac{5}{25} = \underline{\hspace{1cm}}$
