

**SECTION A: Reading Comprehension**

Read the text and circle the correct option, true (T) or false (F).

Around the world

They said he couldn't do it, but early this morning, the American adventurer Steve Fossett finally got out of his helium-filled balloon in Queensland, 700 miles north of Sydney. After six attempts, Steve Fossett has become the first person to fly solo round the world. The journey, of more than 20,000 miles, took him just under fifteen days, although he had a few problems on the way and he almost cancelled the attempt.

Steve took off from Northam in Western Australia on June 19th. He had to postpone his departure for three hours because of a problem with wind, but he finally left, flying past Sydney and New Zealand before starting the long journey over the Pacific to Santiago in Chile. At a news conference, Steve said, 'I had some exciting moments.' At one point, there was a small fire in the balloon. But compared to his earlier attempts, this was a small problem. The difficulties were solved and Steve was able to continue with his epic journey.

Steve now plans to stop ballooning, but he has other interesting hobbies. In 1985, he swam across the Channel between England and France. He took part in the Alaska Dog Race in 1992, and in 1996 he raced in the 24-hour Classic at Le Mans in France. He has the Round the World record for small aeroplanes – in both directions – and in 2001, he sailed across the Atlantic in four days seventeen hours, beating the previous record. He holds another eight world records for speed sailing.

His latest interest is gliding. He already has the world records for 500 and 1000 kilometres. What next? Well, his next project is to fly a glider to the edge of space. It sounds crazy, but adventure is a way of life for this extraordinary, quiet man.
