WHILE YOU WATCH:

2. Watch the video and complete:

- When you think of energy you normally think of \_\_\_\_\_, you think of \_\_\_\_\_ you think of \_\_\_\_\_. But what you don't think of is the \_\_\_\_\_ of \_\_\_\_\_.
- They take the \_\_\_\_\_ of 1,000 guinea pigs, put it in underground chambers and pressure it, and that creates \_\_\_\_\_ gas that can power their \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_.
- This unique method is not enough to replace \_\_\_\_\_, but it shows that you can make something out of \_\_\_\_\_. That you can power a \_\_\_\_\_ from guinea pig poop!

3.4. According to the video:

- Where is the farm? \_\_\_\_\_
- According to the text: What **can** the farmers do with the guinea pigs' poop?

✓ EXAMPLE: The farmers **can** create methane gas.

✓ \_\_\_\_\_  
✓ \_\_\_\_\_  
✓ \_\_\_\_\_  
✓ \_\_\_\_\_

- What do the farmers create with the poop leftovers and bottles?

\_\_\_\_\_

3.5. CIRCLE according what you see in the video.

- Are the farmers drinking **CACA-COLA**?

Yes, they are      No, they aren't

- Are the farmers using the **CACA-COLA** as a fertilizer?

Yes, they are      No, they aren't

- Are they fully replacing electricity with guinea pig's poop?

Yes, they are      No, they aren't
