RISING STARS I
Language - Final Exam

Student's name: _____

Reading comprehension: 1-Nancy s reading about two famous people. Read the text.

Albert Einstein was the smartest physicist in the world. His IQ was 160. People know him because for $E=mc^2$, the most famous equation. He was born on 14 March 1879, in Ulm, Kingdom of Württemberg, German Empire. Albert's father, Hermann Einstein was a featherbed salesman and eventually, he ran into an electrochemical factory with a success. Albert's former mother, Pauline Koch ran a family household. Albert had a sister; her name was Maja. She was born two years after Albert was born. Albert won the Nobel Prize for the explanation of Physics. Eventually, he went to the U.S.A after he was targeted by the German Nazi Party. On April 17, 1955, he died because he had internal bleeding. After he died, a pathologist, Thomas Harvey stole his brain. Thomas kept Albert's brain for 40 years in his basement. Albert's brain was broken in pieces. Now, his brain in parts is now in The Mütter Museum.

Michael Jackson, as known as "King of Pop", was a singer, songwriter and dancer. He was the best pop singer in the world. His net worth was over one billion dollars. His songs are so popular. He was born in August 28, 1958 in Gary, Indiana, USA. His parents were Joe Jackson and Katharine Jackson. Michael started his early career by performing with his four brothers at "pop group of Jackson 5" when he was a child. By the time when he was 11 years old, he was appearing on the TV. And then at 14 years old, he released his first album which is a solo album. Eventually, he became very popular. He had a different face because he had plastic surgery. Sadly, he died on June 25, 2009, because of cardiac arrest. He was buried at Forest Lawn Memorial Park.

1a. Answer the following questions. (6x2=12)
