

Task 5 Read the paragraph from Nick and choose a), b) or c).

My best friend, Ben, is twelve years old. He is sometimes very curious and often reads a lot. Ben doesn't like multiplying, subtracting or doing any other calculations. That is why his least favourite subject at school is Maths. However, he enjoys Science – learning about different creatures and doing experiments. He is also interested in History – he likes battles. We often meet and have fun together. It was my birthday two days ago and we celebrated it in a cafe. Ben gave me the coolest present ever – a new computer game! We had some contests with the rest of my friends and ate some tiramisu and macarons. Next Sunday is Ben's birthday and I already know what to prepare for him – a surprise party at his favourite cafe with some fireworks in the end!

- 1 Ben is ... years old.
 a) 11 b) 10 c) 12
- 2 He doesn't like ...
 a) Maths b) History c) Science
- 3 Ben enjoys ...
 a) experiments and battles b) calculations c) sports
