1 Read the poem and underline the correct option.

Curious Kids

We are the *Curious Kids*,
We love questions with "why"
Like (1) **why is thunder so noisy?**
Or (2) **why does rain fall from the sky?**

Asking questions helps us grow,
And understand lots of things,
Like (3) **why do computers get so hot?**
Or (4) **why do birds have wings?**

We want to know the answers,
We want to know every one,
Like (5) **why is it dark at midnight?**
Or (6) **why are the dinosaurs gone?**

So, join us and be a *Curious Kid*,
Ask lots of questions at school,
Ask questions when you come home
because asking questions is cool!

A curious person is someone who...

a. wants to know more about something.
b. is too kind and caring.
c. doesn't care enough about anything.

2 Read again and write the numbers to match the questions in the poem to the answers below.

a. Because Earth turns its face away from the sun every 12 hours. ____
b. Because a large rock from space probably hit Earth. ____
c. Because of the sound of electrical movements in lightening, which moves quickly from the cloud to the ground. ____
d. Because the electricity that makes it work produces heat. ____
e. Because water droplets in the clouds become heavy enough to fall. ____
f. Because this special feature helps them fly. ____
