

## 1 Read the poem and underline the correct option.

## Curious Kids

We are the *Curious Kids*,  
We love questions with "why"  
Like (1) **why is thunder so noisy?**  
Or (2) **why does rain fall from the sky?**

Asking questions helps us grow,  
And understand lots of things,  
Like (3) **why do computers get so hot?**  
Or (4) **why do birds have wings?**

We want to know the answers,  
We want to know every one,  
Like (5) **why is it dark at midnight?**  
Or (6) **why are the dinosaurs gone?**

So, join us and be a *Curious Kid*,  
Ask lots of questions at school,  
Ask questions when you come home  
because asking questions is cool!

A curious person is someone who...

- a. wants to know more about something.      b. is too kind and caring.      c. doesn't care enough about anything.

## 2 Read again and write the numbers to match the questions in the poem to the answers below.

- a. Because Earth turns its face away from the sun every 12 hours. \_\_\_\_  
b. Because a large rock from space probably hit Earth. \_\_\_\_  
c. Because of the sound of electrical movements in lightening, which moves quickly from the cloud to the ground. \_\_\_\_  
d. Because the electricity that makes it work produces heat. \_\_\_\_  
e. Because water droplets in the clouds become heavy enough to fall. \_\_\_\_  
f. Because this special feature helps them fly. \_\_\_\_
