Unit 3 Reading Evaluation

Complete the graphic organizer to organize the information you read.

What is the life cycle of a frog?

There are three stages.

A frog begins as an egg. The egg hatches in about a week. A small tadpole wiggles out.

A tadpole looks a bit like a fish. It swims around in water, looking for algae to eat.

As the tadpole eats, it grows and changes. The tadpole loses its tail and grows hind legs.

Soon the tadpole is a frog. Now it can hop on land and catch insects with its long tongue.

Read the following passage. Then answer the questions below.

Every summer, Jamie's family goes to a beach to swim in the warm waters. Jamie's mom and dad like to snorkel. They breathe through a tube. They wear goggles so they can see the colorful fish. But Jamie does not swim well. He cannot go snorkeling yet.

This summer, Jamie takes snorkeling lessons. He learns how to breathe through a tube. Then Jamie learns how to swim with flippers. The flippers help him kick better and faster. Finally, Jamie's mom and dad help him practice. For the first time, Jamie gets to snorkel and see the colorful fish.

1. What is the topic of the selection? _____
2. What is the main idea of the selection? _____
3. Why can't Jamie go snorkeling at first? _____
4. What three things does Jamie do in order to snorkel?

Read the passage. Then answer the questions below.

Think about your home when selecting a dog for a pet. If you live in a small apartment, a huge St. Bernard is probably not a good idea. A St. Bernard takes up lots of space. It will get in your way. It may knock objects off tables and shelves with its tail. A tiny Chihuahua, on the other hand, would fit right in. A Chihuahua

can get lots of exercise in a small amount of space. Its bed and dishes won't take up much room. It will be just the right size to fit on your lap. Both kinds of dogs can be nice and friendly. Whichever dog you choose to get will probably become your good friend.

1. What things are being compared and contrasted in the passage?

2. Contrast the sizes of a St. Bernard and a Chihuahua.

3. Compare the personalities of a St. Bernard and a Chihuahua.

4. Which kind of dog do you think would probably enjoy living on a farm? Why?

5. Which of the two dogs would be best for your family? Why?

Fill in the chart with ideas from the story. Circle the ways the two pets are alike.

Some people say cats make the best pets. Others say dogs do. We have one of each, and I love them both. They are both very sweet. They both sit on our laps. Our dog Maggie loves to play fetch, but our cat Smokey just sits and watches as if she thinks Maggie is silly.

Both dogs and cats need lots of care, but dogs need more. Both animals need to be brushed and to visit the vet. Cats keep themselves clean, but dogs need regular baths. Cats are easier in one other big way. They use their litter box on their own. Dogs have to go outside, even in the middle of the night.
