

1. Match the suggestions for improving the environment with their expected results

Suggestions	Expected results
Reducing Single-Use Plastics (e.g. Encourage students to bring their lunches in reusable containers instead of relying on single-use plastic packaging.)	Cleaner school environments and create a positive impact on people's health.
Clean up regularly (e.g. Participating in School Clean-Up Events)	Hands-on learning opportunities for students, promotion of sustainable agriculture, and the creation of green spaces on the school campus.
Establishing a School Garden (e.g. Students planted seeds, watered the plants, and enjoyed harvesting fresh vegetables)	Decreased plastic pollution in school, leading to healthier ecosystems.

2. Read the incomplete paragraph abouts ways to improve the environment. Fill in the blanks with the words from the box.

First	In conclusion	For example
--------------	----------------------	--------------------

There are three ways we can improve our environment in school. (1) _____, we should reduce single-use plastics. (2) _____, we can encourage students to bring their lunches in reusable containers instead of relying on single-use plastic packaging. By doing this, we decrease plastic pollution in our school, leading to healthier ecosystems . (3) _____, we can improve the environment in our school in many ways and even small actions can make a big difference.
