

1. Complete the conversation with the phrases given.

A: _____.

B: The patient is a ten-year-old female. She has very poor circulation.

A: _____.

B: It spiked a lot at first. But she seems better now.

A: _____.

B: That gave us some trouble, too. Her respiration plummeted during transport. So, we intubated.

A: _____.

B: Yes, she is. Her temperature decreased and her breathing stabilized.

2. Use the conversation from Task 1 to fill out the notes.

Spencer County Health

Patient: Calvin, Ashley

Age:

Notes: The ambulance reached the ER at 14:35. At that time, the patient's condition was basically stabilized.

According to the paramedic, the patient's condition changed during transport. At first, the patient's was fluctuating rapidly.

Then, it to dangerous levels.

Finally, paramedics got the under controlled and returned the patient to a safe, temperature.
