

" _____ "
(feat. Norma Jean Martine)

I feel it in my _____, my shoulders, _____ and toes
My bones
Your music gets me through the highs and lows
My head, my _____, knees and _____
My bones
You're keeping me from feeling all alone

I've been praying to a thousand different stars
To a thousand different _____ till I found you
I've been chasing 'bout a thousand different _____
For a thousand million hours, now I've found you

My nights will never be the same, the same again
I've got you running through my _____

I feel it in my _____, my shoulders, _____ and toes
My _____
Your music gets me through the highs and lows
My head, my _____, knees and _____
My bones
You're keeping me from feeling all alone
Oh

You're keeping me from feeling all alone
You're keeping me from feeling all alone

Let me breathe you, take you down into my _____
While we're dancing to the song, now that I've found you
You're a part of me, now I can't let you go
You're the heartbeat in my s, now that I've found you

My nights will never be the same, the same again
I've got you running through my veins

I feel it in my _____, my shoulders, _____ and toes
My _____
Your music gets me through the highs and lows
My head, my _____, knees and _____
My bones
You're keeping me from feeling all alone
Oh

You're keeping me from feeling all alone
You're keeping me from feeling all alone

Music: Offenbach & Quarterhea
